this presentation was prepared using Prosper.

Overview

- The `Prosper` class
- Why use `Prosper`?
- Basic Structure
- Compilation process
- Miscellaneous features
- `Prosper` at the IAC
- Useful links
- Examples

The Prosper class

- Prosper is a \LaTeX class for writing transparencies. All common \LaTeX macros are available.

The Prosper class

- Prosper is a \LaTeX class for writing transparencies. All common \LaTeX macros are available.
- The Prosper class translates into two different formats:

The Prosper class

- Prosper is a \LaTeX class for writing transparencies. All common \LaTeX macros are available.
- The Prosper class translates into two different formats:
 - Adobe® *Postscript*TM

The Prosper class

- Prosper is a \LaTeX class for writing transparencies. All common \LaTeX macros are available.
- The Prosper class translates into two different formats:
 - Adobe® *Postscript*TM
 - Adobe® *Portable Document Format*TM (PDF)

The Prosper class

- Prosper is a \LaTeX class for writing transparencies. All common \LaTeX macros are available.
- The Prosper class translates into two different formats:
 - Adobe® *Postscript*TM
 - Adobe® *Portable Document Format*TM (PDF)
- Presentations are viewed with the *Acrobat Reader*.

Required packages and programs

- graphicx.sty, seminar.sty (teTeX 0.9 and above)
- Slide styles need PSTricks and AMSLaTeX (amssymb)
- recent version of hyperref (≥ 6.69)
- Recent version of dvips (v. 5.85 and above)
- Recent version of Ghostscript (version ≥ 6.0) to produce PDF

L^AT_EX packages for presentations

- PDF_Latex
- slides class
- Seminar package
- Prosper class
- Beamer class
- TexPower
- ...

Main features

- Simple structure, few new commands

Main features

- Simple structure, few new commands
- System independent (Windows, Unix, Mac,...)

Main features

- Simple structure, few new commands
- System independent (Windows, Unix, Mac,...)
- Step-by-step itemization environment

Main features

- Simple structure, few new commands
- System independent (Windows, Unix, Mac,...)
- Step-by-step itemization environment
- Several transitions types between slides:
Replace, Split, Box, Wipe, Dissolve, ...

Main features

- Simple structure, few new commands

Why use Prosper?

😊 if you don't like PowerPoint

Why use Prosper?

- 😊 if you don't like PowerPoint
 - easy to use, even for \LaTeX beginners

Why use Prosper?

- 😊 if you don't like PowerPoint
 - easy to use, even for \LaTeX beginners
 - **for scientific presentations:** *postscript* figures, formulas and tables directly taken from papers

Why use Prosper?

😊 if you don't like PowerPoint

- easy to use, even for \LaTeX beginners
- for scientific presentations: *postscript* figures, formulas and tables directly taken from papers

For example,

$$\begin{array}{ll} \nabla \cdot \vec{E} = \rho & \nabla \cdot \vec{B} = 0 \\ \nabla \times \vec{E} = -\frac{\partial \vec{B}}{\partial t} & \nabla \times \vec{B} = +\frac{\partial \vec{E}}{\partial t} \end{array}$$

Why use Prosper?

😊 if you don't like PowerPoint

- easy to use, even for \LaTeX beginners
- for scientific presentations: *postscript* figures, formulas and tables directly taken from papers

For example,

$$\begin{aligned}\nabla \cdot \vec{E} &= \rho & \nabla \cdot \vec{B} &= 0 \\ \nabla \times \vec{E} &= -\frac{\partial \vec{B}}{\partial t} & \nabla \times \vec{B} &= +\frac{\partial \vec{E}}{\partial t}\end{aligned}$$

Basic Structure

```
\documentclass[pdf, ...]{prosper}
\title{Some presentation}
...
\begin{document}
\maketitle
...
\begin{slide} [transition]{Title}
  normal text/graphics on slide
\end{slide}
```

Options of the class

```
\documentclass [options] {prosper}
```

- pdf or ps; slideBW or slideColor; colorBG or nocolorBG; final or draft
- Style: frames, azure, autumn, contemporain, darkblue, troispoints, ...

Example:

```
\documentclass [pdf, contemporain, slideColor,  
colorBG] {prosper}
```

Macros in the preamble

```
\title{}
```

```
\subtitle{}
```

```
\author{}
```

```
\email{}
```

```
\institution{}
```

```
\slideCaption{}
```

```
\Logo(x,y){\includegraphics[width=1cm]{logo.eps} }
```

```
\DefaultTransition{}
```

The slide environment

```
\begin{slide}[transition]{Slide title}
```

- **Transitions:** Split, Blinds, Box, Wipe, Dissolve, Glitter, Replace
- **Placing text and figures:**

```
\begin{minipage}{4cm}
```

```
\includegraphics[]{} 
```

```
\end{minipage}
```

```
\begin{minipage}{5cm}
```

```
material for slide
```

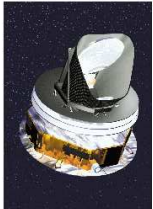

```
\end{minipage}
```

SZ surveys

- APEX (MPIfR, UC Berkeley)
- AMI (Cambridge)
- SPT (U. Chicago)
- ACT (Princeton, Penn)
- PLANCK

APEX

- SPT: 4000 sq. deg ($1.3'$).
 $M_{cluster} > 4 \times 10^{14} M_{\odot}$.
Expect. 20,000 clusters.
- APEX: 250 sq. deg ($0.8'$)
- ACT: 100 sq. deg ($1.7'$)
- PLANCK ~ 10000 cl. in all sky ($5'$)

Galaxy Seminar. MPIA. Heidelberg, December 12th, 2003 – p.12/41

Step-by-step

```
\overlays{n}{  
\begin{slide}{...}  
...  
\end{slide}}
```

Only in pdf mode!!!

- **Macros:**

```
\begin{itemstep}  
\item ...  
\end{itemstep}
```

(no replacement)

```
\fromSlide{m}{}  
\onlySlide{m}{}  
\untilSlide{m}{}  
\FromSlide{m}
```

(replacement)

```
\fromSlide*{m}{}  
\onlySlide*{m}{}  
\untilSlide*{m}{}  
\FromSlide*{m}
```

The compilation process:

The compilation process:

$\boxed{\text{L}\text{T}_{\text{E}}\text{X}}$ \rightarrow $\boxed{\text{DVI}}$

The compilation process:

The compilation process:

- `dvips`

Printing slides

The compilation process:

- `dvips`

Printing slides

- `ps2pdf`

- `dvi2pdf` (Perl script).

On-screen display

Miscellaneous Features

- Prosper allows to set links and targets within the presentation with the `\hyperlink` and `\hypertarget` commands. (E.g. this is a [link](#) to the last page).
- Embed animations within a presentation. E.g. to embed an **MPEG movie**, you can include the following code:

```
\href{run:movie.mpg}{Click here to view the movie}
```
- Easy to convert the PDF presentation to an HTML slideshow (e.g. using the Python script `pdf2htmlpres.py`).

Prosper at the IAC

- Prosper: http://goya/inves/SINFIN/sie_courses.html

- Local directory:

`/usr/pkg/tex/tex-2.0.2/share/texmf-local/tex/latex/prosper/`

- IAC logos:

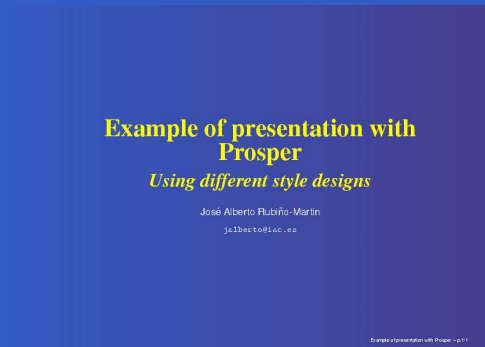

`logoiac_blue_bg.ps`

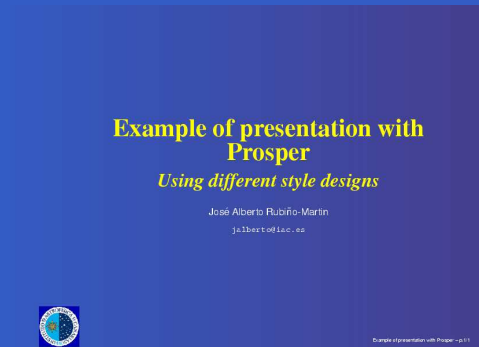

`logoiac_white_bg.ps`
